DETAILED ACTION

1. Claims 1-149 were pending in the instant application at the time of the issuance of the previous Office Action, mailed November 30, 2007. By the latest response from the applicant, filed December 7, 2007, claims 96 to 107 have been cancelled. Therefore claims 1-95 and 108-149 remain pending and have been examined.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 129-147 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The preamble of claim 129 indicates that it is directed to a computer program product embodied in a memory medium that, when read out, directs a system to undertake the steps coded for. However, the medium is not explicitly claimed as being computer-readable. Therefore the claim is directed towards functional descriptive material that represents a judicial exception to the statutory classes of invention eligible for the grant of a US patent. The computer-program product in claim 129 is not explicitly claimed as embodied in a computer-readable medium, therefore the scope of the claim must include the case, for example, where the program is read by a user and then manually entered into a computer by using an input interface such as a keyboard. The memory medium storing the program is not read out by the computer and therefore it is not a computer component. The

memory medium cannot effect a change of state of a processor so as to produce a tangible result. See MPEP 2106[R-6]. Claims 130-147 are dependent on claim 129 and do not cure its deficiency. Therefore, claims 130-147 are rejected on the same basis as claim 129.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 8 and 40-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As for claim 8, the claim recites the phrase: "...wherein the step of creating a package comprises an executable..." The meaning of the phrase is not clear. An executable is a compiled computer program, not a method step in a process.

As for claim 40, the claim recites the phrase in the preamble of: "A method according to claim 5 for providing data security in a first device driver..." There is a lack of antecedent basis for this limitation since claim 5 and its base claims do not contain any limitation directed to providing data security in a device driver. Claims 41-54 are dependent on claim 40 and are therefore rejected on the same basis as that claim.

As for claim 50, the claim recites the phrase: "...the step of destroying the data..." There is a lack of antecedent basis for this limitation. Claim 51 is dependent on claim 50 is rejected on the same basis as that claim.

Allowable Subject Matter

6. Claims 1-7, 9-39, 55-95, and 108-128, 148 and 149 are allowed.
